### **DETAILED ACTION**

1. Applicant's preliminary amendment filed June 28, 2004 is acknowledged and entered. Claims 1-10 are pending and subject to the following restriction requirement.

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a method of producing pestivirus-like particles, classified in class 435, subclass 69.1.
  - II. Claims 9-10, drawn to a use of three nucleic acid sequences for the preparation of a medicament useful as a vaccine against a pestivirus infection, classified in class 435, subclass 4.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are distinct methods, lacking any evidence to the contrary.

The "use" claims of Group II do not clearly set forth what type of method is being claimed. It is strongly suggested that Applicant rewrite claims 9-10 to recite a proper claim preamble. Without a clear understanding of the use of claims 9-10, the claims have been interpreted as a separate method from claims 1-8.

Because these inventions are distinct for the reasons given above and the literature search required for Group I is not co-extensive with Group II, and therefore a serious search burden, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1648

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
